PUJAN SHARMA

📍 San Bruno, CA 94066 (Silicon Valley Area) | 📞 +1 (650) 338-9896 | ✉️ pujansharma@my.smccd.edu | ⚖️ Authorized to work in the US
🔗 Certification Records: CySA+ / Tech+ | Linux+

PROFESSIONAL SUMMARY

Hands-on **Data Center & Network Infrastructure Technician** pursuing a B.S. in Information Technology with direct expertise in fiber optics (CFOT), premise cabling (CPCT), rack and stack deployment, structured cabling infrastructure, Layer 1 certification testing, and enterprise systems support. Proven track record maintaining high availability in operational environments, managing work order ticket queues, executing SLA-compliant change controls, and delivering high-touch customer support. CompTIA Network+, FOA CFOT, and FOA CPCT certified with specialized college coursework in Data Center Infrastructure & Management.

CORE COMPETENCIES & TECHNICAL SKILLS

Data Center Infrastructure:	Rack & Stack Equipment, Fiber Optic Splicing & Termination (CFOT), Premise Cabling (CPCT), Structured Copper & Fiber Management, Overhead Cable Trays, Patching, Cage Infrastructure, Access Control & Escort, Facility Security
Networking & Testing:	Layer 1 Certification Testing (OTDR / Insertion Loss), Layer 2/3 Fundamentals, Cross-Connects, Subnetting, VLANs, TCP/IP, Router & Switch Configuration, Network Troubleshooting
Systems & Tools:	Active Directory, Linux (CLI), Windows Server, Microsoft 365, Microsoft Visio (Diagramming & Mapping), POS Systems, User Access Management
Operations & Soft Skills:	Work Order Queue Management, SLA Adherence, Customer Service & Escalation, Technical Documentation, Vendor Oversight, Task Prioritization

RELEVANT EXPERIENCE

IT / Cybersecurity Operations Intern | **Larsen & Toubro - Digital Energy Solutions** — June 2025 – Present | Fairfield, CA

- **Equipment Deployment & Data Center Rack/Stack:** Deployed, mounted, and configured 30+ physical workstations and enterprise endpoints in a high-security operational technology (OT) environment.
- **Fiber & Structured Cabling Infrastructure:** Managed physical and logical network connections, installing and dressing fiber optic and copper cabling, LAN/WAN/VPN infrastructure, and patch panels.
- **Documentation & Asset Tracking:** Utilized Microsoft Visio to map physical network architecture, cable paths, and update local asset tracking databases for audit compliance.
- **Troubleshooting & Support:** Responded to system alerts, investigated physical layer and network connectivity issues, and maintained high uptime across operational infrastructure.

Network & Computer Systems Administrator | **BayHill Inn** — January 2025 – Present | San Bruno, CA

- **Customer Experience & Access Control:** Interface directly with guests and technical vendors, providing high-touch customer support, facility access control, and escorting services.
- **Queue & Ticket Management:** Oversaw daily IT work orders, system updates, payment technology, and digital workflow tickets while consistently meeting time commitments.
- **Staff Training & Escalation:** Developed standard operating troubleshooting procedures and trained staff on system navigation, facility security protocols, and incident escalation.
- **Systems Maintenance:** Maintained local hardware, network equipment, and access control systems, ensuring high availability and strict operational security.

EDUCATION & ACADEMIC CREDENTIALS

Bachelor of Science (B.S.) in Information Technology — Jan 2025 – Dec 2026 | Irvine, CA

University of Massachusetts Global

Associate of Science (A.S.) in Network Engineering Technology — Jan 2023 – Dec 2026 | San Bruno, CA

Skyline College

- **Relevant Coursework:** *Data Center Infrastructure & Management, Fiber Optics & Cabling (CFOT/CPCT Prep), Router & Switch Configuration, Layer 1–3 Networking, Server Administration, Subnetting & VLAN Implementation.*
- **Practical Labs:** Hands-on experience racking enterprise switches, servers, and patch panels; terminating, splicing, and testing fiber optic and copper cabling; organizing overhead cable trays.

Associate of Arts (A.A.) in General Business — Jan 2023 – June 2026 | Irvine, CA

University of Massachusetts Global

CERTIFICATIONS & PROFESSIONAL CREDENTIALS

FOA Certified Fiber Optics Technician (CFOT) — Certified / In Progress

Fiber optic installation, splicing (fusion & mechanical), connector termination, OTDR testing, and fiber cable management.

FOA Certified Premises Cabling Technician (CPCT) — Certified / In Progress

Copper and fiber premises cabling, structured cabling installation standards, patch panel termination, and certification testing.

CompTIA Network+ (N10-008) — Certified Nov 2025

Network architecture, Layer 1–3 routing & switching, subnetting, cabling standards, and network troubleshooting.

CySA+ (Cybersecurity Analyst) Training — May 2026

Threat detection, incident response, network defense, system hardening, and security operations.

Tech+ Certification (Ascend Education) — Jan 2026

IT infrastructure, hardware deployment, network protocols, and troubleshooting methodology.

CompTIA Linux+ Training — Jun 2025

Linux CLI administration, file management, permissions, and server maintenance.
